

INTERIM CREDENTIALS

Welcome Back to School!

We're thrilled to have you on board and look forward to supporting you every step of the way. Please reach out to Audra Kellams at ak@etalliance.org with any questions, concerns, or support with the enrollment process.

Exciting VR Training Opportunity for Schools

Google Partnership Brings Free Headsets to Your Program

Thanks to funding and support from Google, training programs that register six students for the Virtual Reality, Branch Circuit Wiring course will receive a free Meta 3S headset—plus another for every additional six students (while supplies last). The headsets come with a 3-year warranty, 256 GB memory, and a two-year device management program, making setup and app management easy.

New VR modules launch this September, with topics like Photovoltaics and Wind Turbines coming soon. All registered students will automatically have access to the new content, with no extra fees or registrations required.

IC Course License Policy Update for Schools

Flexible License Management for Student Enrollment

Key Points

- Schools can now remove assigned IC course licenses up to 21 days after assigning them to a student, recovering the license for credit or reuse.
- If a student is unenrolled from the course within 21 days, the license moves back into the school's available license pool as if it had never been used.
- Once back in the pool, schools have two options:

1. Request a full credit using the bookstore ("My Account" > "License Credit Request").
2. Reassign the license to another student.

If a license is used for more than 21 days, it cannot be credited or reassigned and will be removed from the school's account when the student is unenrolled.

Licenses purchased over 1 year ago are not eligible for credit requests.

Licenses purchased more than 2 years ago cannot be reassigned to any user.

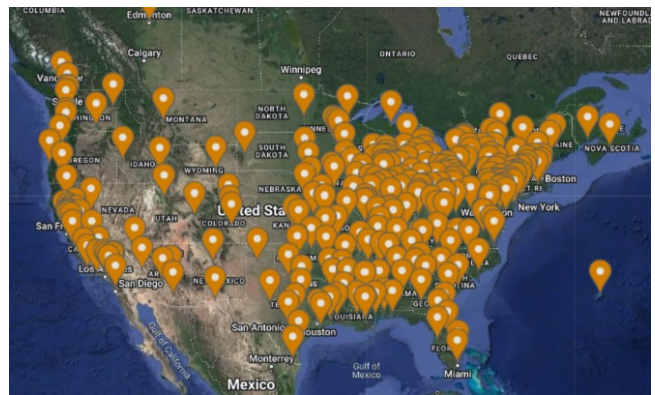

Example:

A school assigns a license to a student for an IC course. After 15 days, the school decides the student will not continue and unenrolls them. Because the license was used for less than 21 days, it returns to the available license pool, ready for credit or reassignment.

Find Your Nearest etA-Affiliated Training Center

Enhance Student Experiences
Through Local Partnerships

Are you aware of the closest electrical training ALLIANCE (etA) affiliated training center in your area? Strengthen your students' Interim Credentials journey by building connections with nearby training centers.

You can connect with a local Training Director to discover how you can collaborate with an etA apprenticeship program. These partnerships unlock opportunities like participating in career fairs, arranging field trips to state-of-the-art training facilities, experiencing hands-on skill demonstrations, and engaging directly with current electrical apprentices.

For help getting started, reach out to Audra Kellams (ak@etalliance.org) or use [this map link](#) to locate a training center near you.

Together, you can open new pathways and enrich your students' learning experience!

Utilizing the Reports Tab in the LMS

Comprehensive tools to monitor student progress and access certificates

Within the LMS, click the "Reports" tab in the top ribbon.

- To review detailed information on student performance, navigate to the "Reports" tab located on the dashboard ribbon.
- Select "Student Overview Reports," followed by "Computer Mediated Learning (CML) Reports." For an in-depth analysis of student progress, choose "Interim

Credentials Course Report."

- Time and login activity reports are also accessible in this section.
- Student certificates can be obtained through the "Utility Reports" link.

This structured approach ensures thorough oversight of student achievements and record-keeping within the LMS.
